SUMMARY

Hi, I'm Sarthak, a B.Tech CSE student specializing in Data Science Engineering, with hands-on experience in AI/ML, automation systems, and scalable system design (LLD & HLD). Proficient in Data Structures & Algorithms with a problem-solving mindset. Skilled in building end-to-end data-driven workflows and pipelines. Ranked 19th at Smart India Hackathon(SIH) in my first year. A fast learner with a passion for emerging technologies - give me a problem, and I'll cover every edge case to crack it.

EXPERIENCE

Java Spring and Hibernate Developer

Feb '26 — Apr '26

Digital IntelliJ

Delhi, India

- **Engineered** an end-to-end lead ingestion **automation** pipeline using **Spring Scheduler** to execute background **Cron jobs** via **Java** and **Spring Boot**, periodically polling the **Meta Graph API** to sync social platform prospects directly into the CRM and reduce manual data entry to **0%**.
- **Designed** a smart data parsing and deduplication engine that sanitizes incoming **JSON** payloads from **REST APIs** against active CRM records, reducing database duplicates by **98%** and ensuring high-quality, actionable pipeline data.
- **Automated** instant, multi-channel dispatch systems utilizing **asynchronous multi-threading** to trigger personalized **JavaMail** emails and **WhatsApp Business API** alerts to both the customer and sales agents upon lead ingestion, accelerating outreach response times by **70%**.
- **Refactored** security layers using **Spring Security** and **BCrypt encryption** for secure token-based user recovery while developing automated **Python (openpyxl)** scripts to execute **17+** end-to-end integration test scenarios.

AI Automation Developer

Nov '25 — Jan '26

Denicx

Remote

- Developed a Python-based automated Purchase Order (PO) processing system that reduced manual effort by 95% and improved processing speed by 500%+ through intelligent email monitoring and workflow automation.
- Integrated Gmail/Outlook APIs, custom PDF parsers, and Google Sheets to automatically detect PO documents, extract structured data with 98%+ accuracy, and manage real-time PO tracking workflows.
- Implemented automated follow-ups, validation checks, and scalable orchestration pipelines to streamline handling of multiple operational and communication scenarios.

SKILLS

Programming Languages C++, SQL, Python, Java, NoSQL

Tools Tableau, MySQL, MongoDB, Docker, Git, PostgreSQL

Skills LLM, NLP, Generative AI, AI/ML, Automation workflows, System Level Design

frameworks/libraries Spring Boot, NumPy, Pandas, PyTorch, TensorFlow, RestAPI

PROJECTS

Web Scraper, Prismix

Oct '25 — Present

Noida, India

- Built a high-performance, automated and parallelized web-scraping system using Node.js and Apify, crawling 335+ Etsy root categories, expanding to 5,000+ sub-categories, and extracting 290,000+ product listings across 1,000+ pages using multi-worker concurrency, real-time progress tracking, and automatic retry handling.
- Designed a scalable MongoDB automation pipeline to store and index 300K+ structured records, enabling high-volume analytics, automated workflows, marketplace intelligence, fast querying, and long-term data persistence.

PO - Email-Automation/AI-Expeditor

- Built a Python-based end-to-end automated Purchase Order (PO) processing system that reduced manual effort by 95% and improved processing speed by 500%+, automatically monitoring X+ emails/day, detecting PO PDFs with 98%+ accuracy, and extracting structured data (PO number, items, quantities, prices) across Y document formats.
- Designed an automation pipeline integrating Gmail/Outlook APIs, custom PDF parsers, semantic search, and Google Sheets to manage Z+ active POs, handle N communication scenarios, perform automated follow-ups, data validation checks, and real-time tracking through a scalable Python orchestration layer.

ETSY SELLER DASHBOARD : Seller_Comparison

- This Tableau dashboard visualizes top Etsy sellers and their performance metrics, showcasing comparative sales insights, ranking patterns, and category-level trends to help identify high-performing shops and market opportunities.

EDUCATION

B.Tech in Computer Science , Bennett University

Sep '23 — Present
Greater Noida, India

- Relevant Coursework: Data Structures & Algorithms, AI/ML, Data Science, System Designing (HLD - LLD).
- Clubs: IT Sub-Head in University Student council, GFG(geeks for geeks)
